

AC SEPAROL G

AC SEPAROL G is an interleavant powder based on polymethyl methacrylate for transport and storage of glass. It is normally used when powdering float glass on-line.

AC SEPAROL G has a medium particle size of approx. 120 µm.

The recommended application rate is 50 - 200 mg/m².

Specification

Bulk density:	620 – 760 g/l	DGF H-II 1b
Particle size > 350 µm:	max 0,1 %	Laser Particle Analysis
Temperature resistance:	passed	AC MV 26 (80 °C, 30 min)

Handling

When handling AC SEPAROL G, the use of safety gloves and a dust mask is recommended. For further safety advice please see our Material Safety Data Sheet.

Storage

Stored in well-closed containers at temperatures between 5 to 40 °C AC SEPAROL G has a shelf-life of minimum 1 year.
