

## ACECLEAN 6147

ACECLEAN 6147 is a neutral, foam free product especially for cleaning of coated glass and mirror glass. It is usually used for the end control of insulating glass. ACECLEAN 6147 can also be used for general manual cleaning of flat glass. It dries off completely without leaving streaks or stains. ACECLEAN 6147 is free of silicone and film-forming compounds which could detract further processing.

### Application

ACECLEAN 6147 is applied on the glass surface as a thin film (e.g. by spraying). Then it is wiped away with a lint-free cloth or paper. Residues of the cleaner disappear stain- and streakfree. For a perfect cleanup don't spray too large faces at the same time otherwise the glass cleaner might dry too fast.

### Specification

pH (conc.):	6,6 – 7,5	DGF-H-III 1
Density :	0,978 – 0,986 g/l	DIN 51757 (20 °C)
Refractive index:	1,3390 – 1,3495	DIN 51423 (20 °C)

### Handling

ACECLEAN 6147 does not need to be labelled in accordance with EC directives or respective national laws. For more safety information please see the Material Safety Data Sheet.

### Storage

Stored in well closed containers at temperatures between 5 and 40 °C the minimum shelf life of ACECLEAN 6147 is 1 year.
