

SCHALLOPON MH

SCHALLOPON MH is a neutral ultrasonic cleaning agent for use in precision optics and ophthalmics. It effectively removes oils and fats. It is preferably used for the coat-ready cleaning ophthalmics and precision optics.

SCHALLOPON MH can also be used to clean sensitive metal surfaces.

Recommended use concentration:

	Concentration	Temperature
Coat-ready cleaning	0,5 – 1%	20 – 40 °C
Metallic parts	1 – 2 %	30 – 60 °C

Specifications:

pH (10%):	6,5 – 7,5	DGF-H-III 1
Refractive index:	1,422 – 1,436	DIN 51423 (20 °C)
Colour number:	max. 2 Gardner	

Handling

Pursuant to hazardous goods legislation, SCHALLOPON MH is classified as “irritant”. We recommend the use of protective goggles and gloves when handling the product.

For more safety information, please refer to the Material Safety Data Sheet.

Storage

The minimum shelf life of SCHALLOPON MH is one year provided the drums are well sealed and the storage temperature is between 5 and 40°C.
